Handbook · Regional Leagues

60 clubs · D1A / D2A / D2B · Regional Cup

This handbook uses actual screenshots from local training with synthetic clubs, accelerated time and simulated scores. Admin setup was performed on the website. Bulk registration and match processing explicitly used a test helper and existing protected application actions. No real emails were sent, no EA integration was demonstrated and nothing was deployed to production. A training run does not prove every exception or production scale. The first simulated batch omitted club metadata in player statistics. The helper was corrected; individual competition screenshots cover only the subsequent correctly linked reports. Full-season individual statistics are therefore not signed off as a complete acceptance pass.

20 · A new season in the same permanent league

21 · Where to find everything

01 / STAGE

Start in Regional Leagues

Open Admin → Regional Leagues. Start guided task starts a task. Leagues & Cups lists existing competitions; Management holds separate management actions. This demonstration begins with 60 synthetic clubs and four players per club, but no leagues. A local helper prepared the profiles and demonstration trophies. No production database is used.

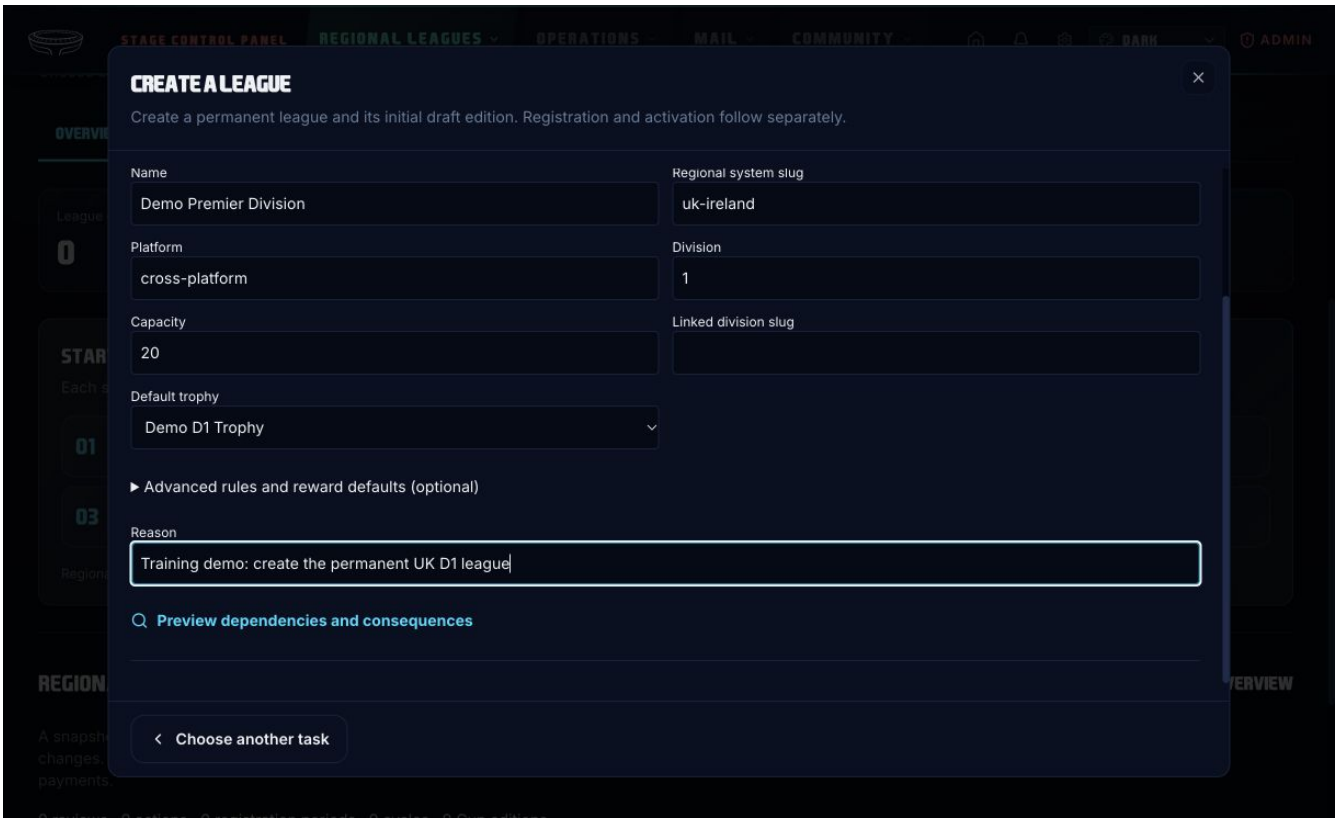

01 · 01-admin-empty · LOCAL TRAINING

02 / STAGE

Create permanent leagues once

Choose Create a league. Create D1 and D2 in the same regional system and platform: uk-ireland, cross-platform, Capacity 20 in this example. Select the existing catalogue item under Default trophy. Sporting allocation creates D2B later; do not create a second independent D2 league for it. A new season is an edition of the same permanent league.

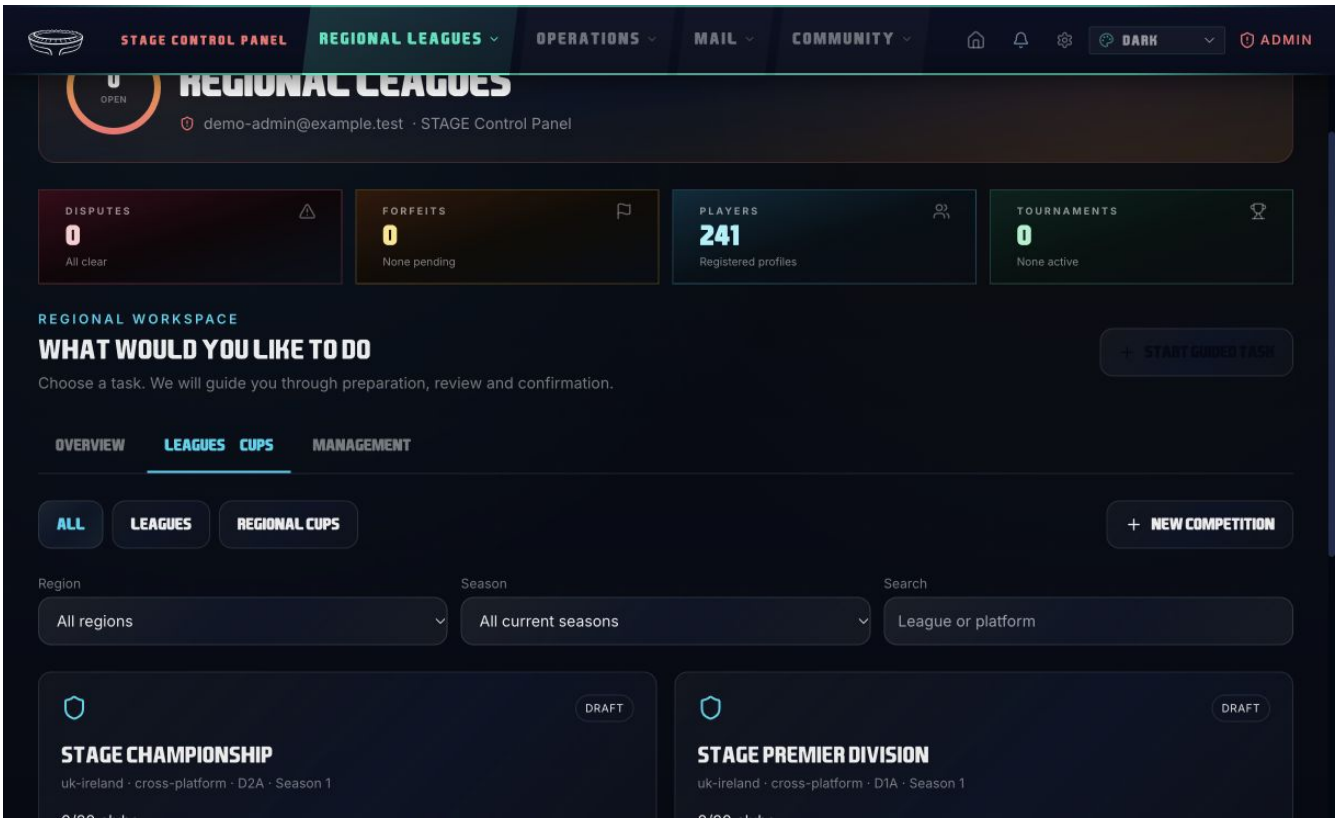

02 · 02-create-league-fields · LOCAL TRAINING

03 / STAGE

Verify the saved leagues

Click Preview dependencies and consequences, read the summary, tick confirmation and choose Confirm create. In Leagues & Cups, verify the two leagues and their initial draft editions. A draft has no published matches yet. A refresh can leave a form empty again: check the saved list before creating anything twice.

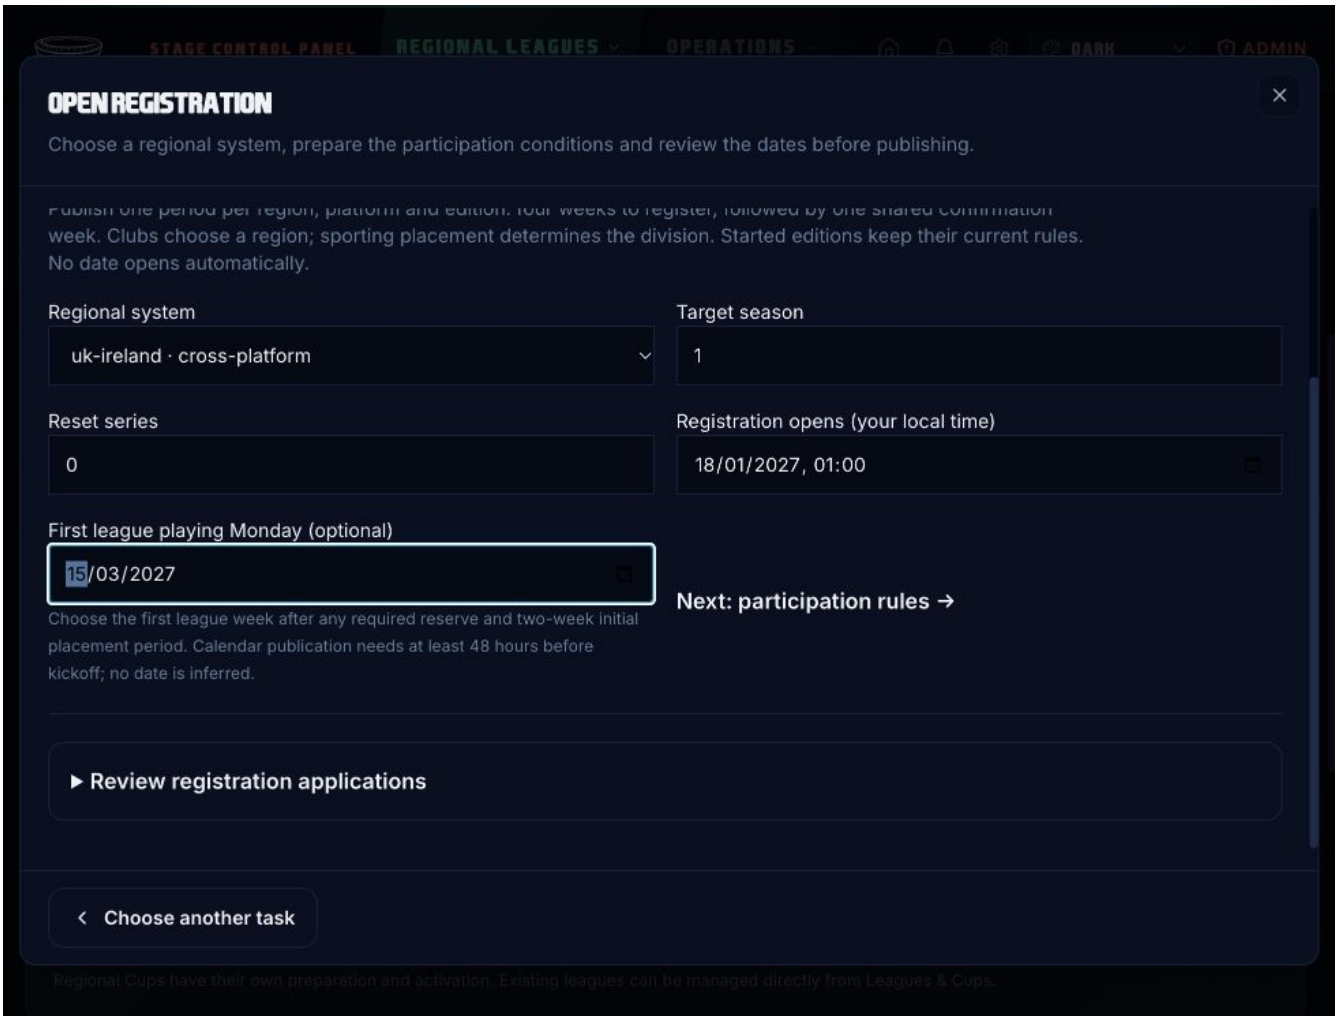

03 · 05-two-permanent-leagues · LOCAL TRAINING

04 / STAGE

Publish one regional registration period

Choose Open registration. The D1 system is the entry point for the entire region, not a promise of D1 membership. Example: Target season 1, Reset series 0, registration from 18 January 2027, first league week Monday 15 March. Four registration weeks end on 15 February; the shared confirmation week ends on 22 February. Reserve supplementation closes at most 48 hours later. These are training dates, not a launch schedule.

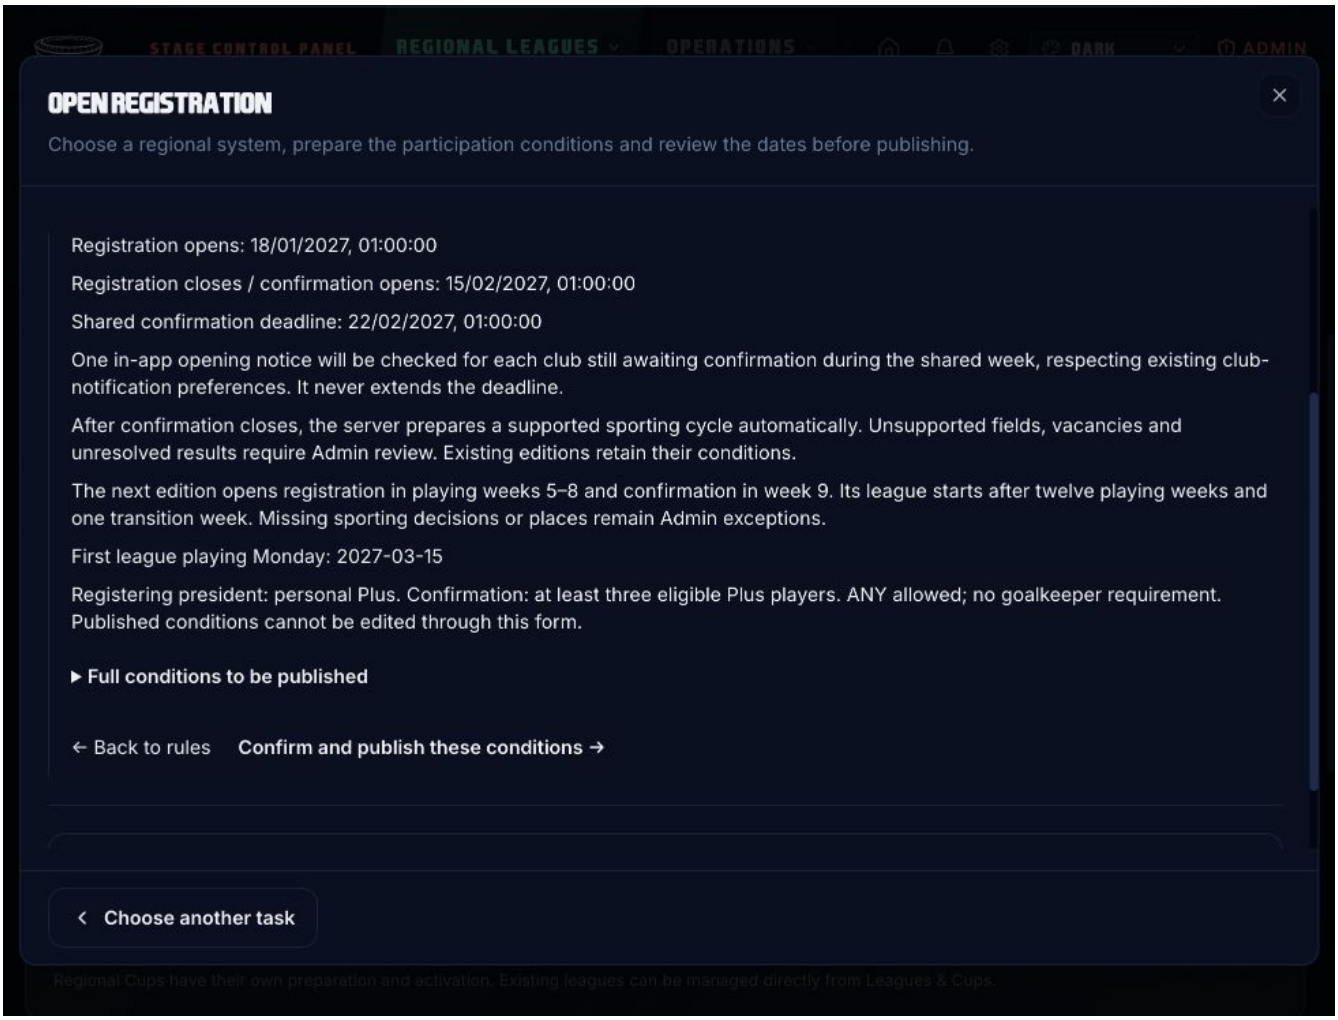

04 · 08-registration-dates · LOCAL TRAINING

05 / STAGE

Publish conditions before clubs enter

Keep Include Regional Cup entry checked when the Cup is part of participation. Fill Published edition rules and Administrative reason. The server appends the applicable recorded policies. Read Full conditions to be published and the calculated deadlines, then choose Confirm and publish these conditions. This does not create participants, groups or payments. Published conditions belong to that edition and are not rewritten later through this form.

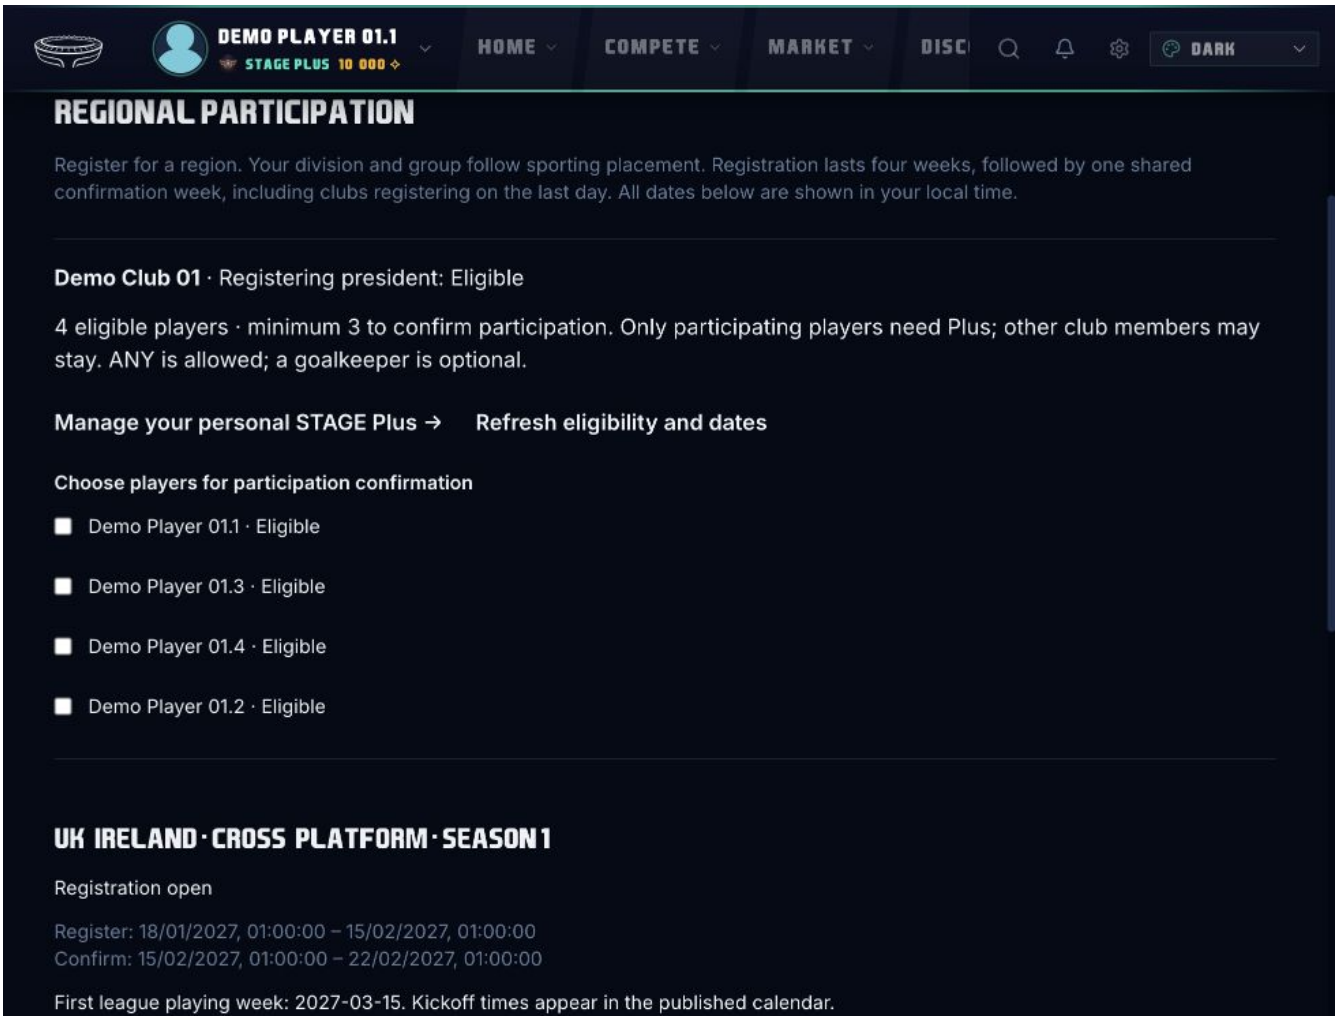

05 · 10-registration-review · LOCAL TRAINING

06 / STAGE

The president applies for the club

From the region or club, the president opens Your club’s participation. The club selects a region and accepts its published conditions, without choosing a division. The president needs personal STAGE Plus. One club applied through the visible page in this demonstration; the other 59 used the same protected application action through the local helper.

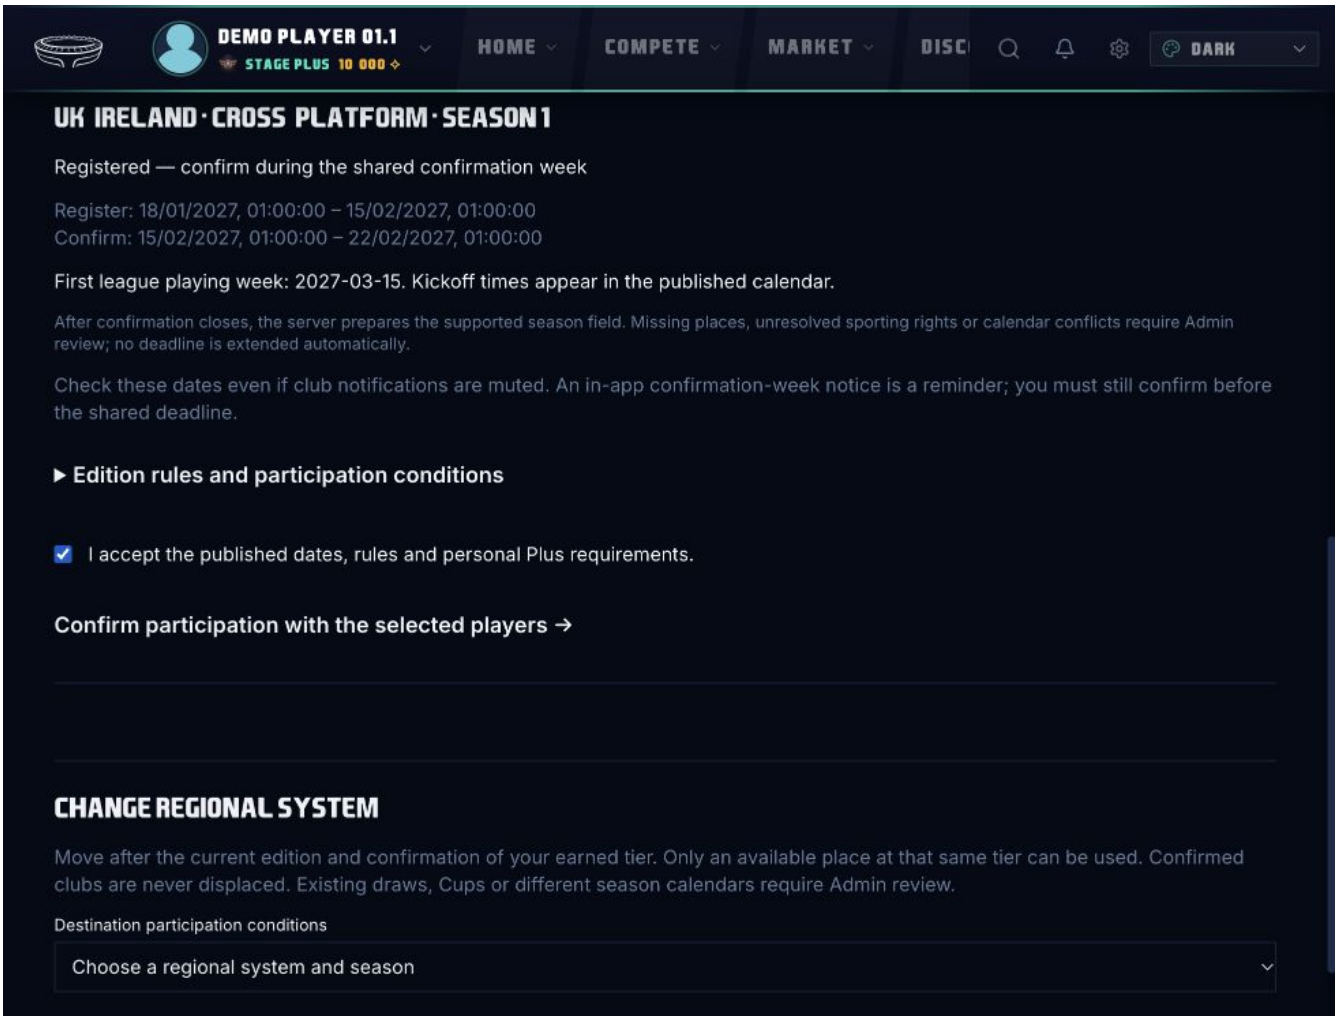

06 · 12-club-registration · LOCAL TRAINING

07 / STAGE

Registration and confirmation are separate

During the shared confirmation week, the club selects at least three eligible players with personal Plus and confirms participation. A bench nomination is not actual match participation. A goalkeeper is optional; ANY is allowed. Every club has the same deadline, including clubs applying on the last registration day. Admin can inspect applications under Open registration → Review registration applications.

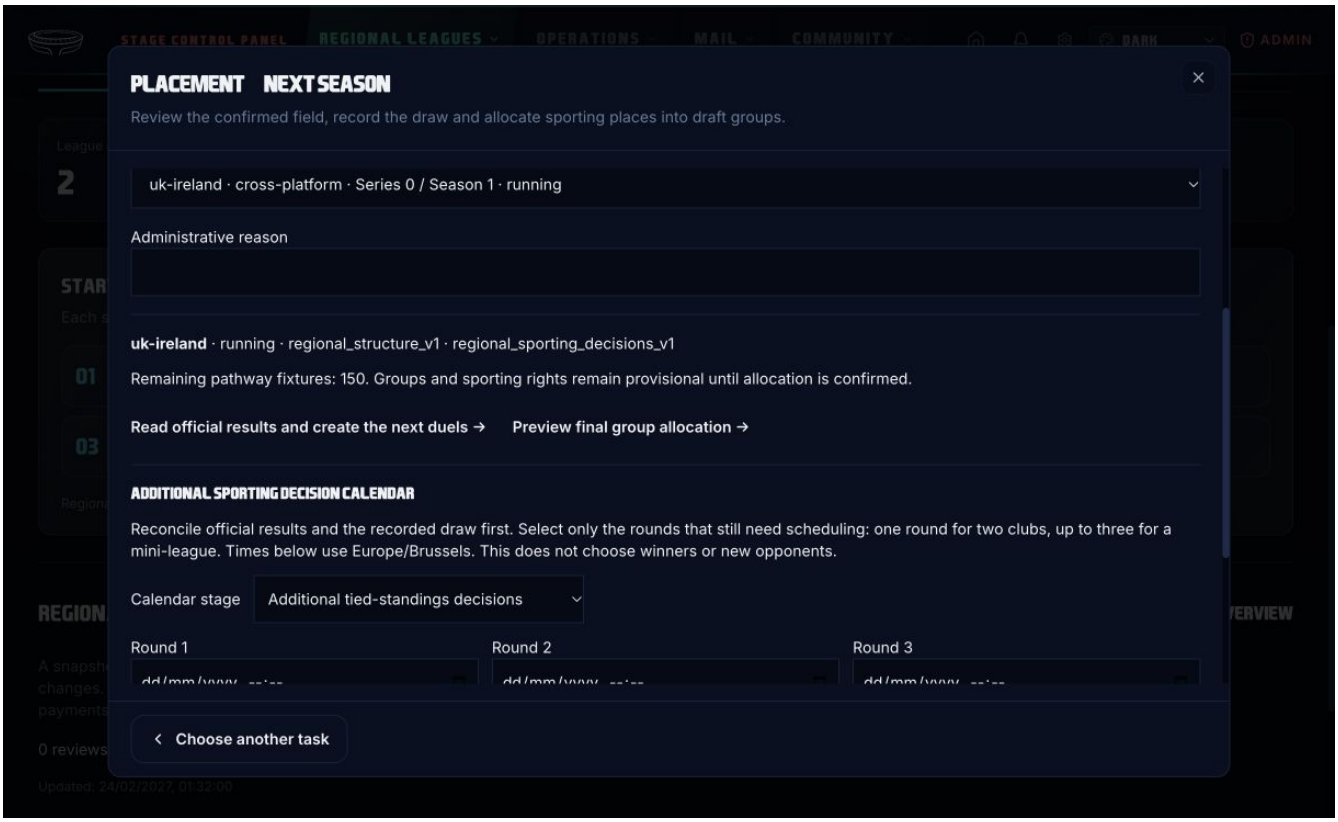

07 · 14-club-confirmation · LOCAL TRAINING

08 / STAGE

Prepare initial sporting placement

After confirmation and the shared reserve period, the system determines the supported field. Open Placement & next season and select the stored cycle. Use initial placement for the first edition. With 60 clubs: ten groups of six, five matches per club, 150 in total. The previously discussed 40-club format is different. Reopening a stored cycle preserves its draw.

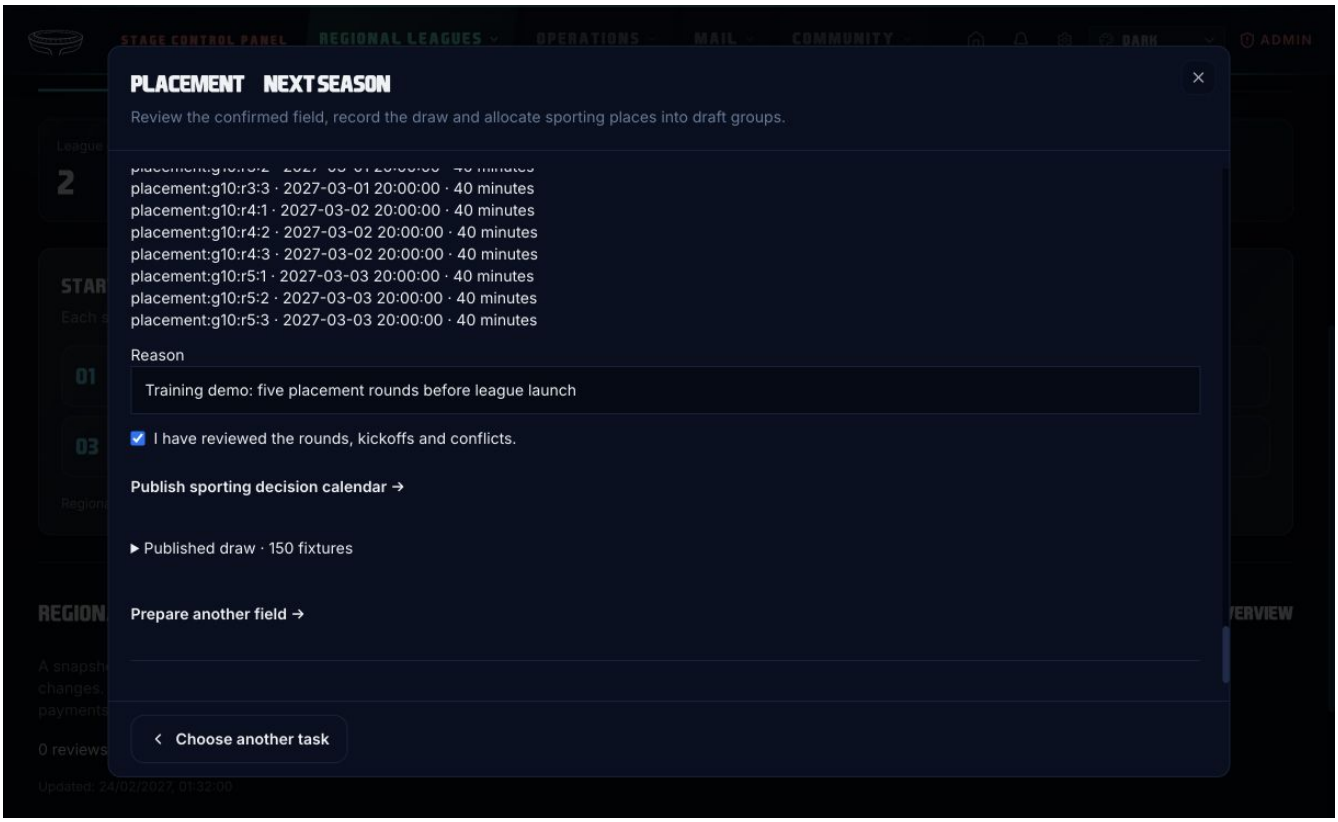

08 · 17-placement-cycle · LOCAL TRAINING

09 / STAGE

Schedule the placement rounds

The saved draw defines opponents, but not every kickoff time. Open the placement cycle calendar and enter each round's date and time. The demonstration uses 26–27 February and 1–3 March at 20:00 Europe/Brussels. Review and publish. In real matches, clubs publish their lineups, mark ready, then submit evidence and actual participants after playing.

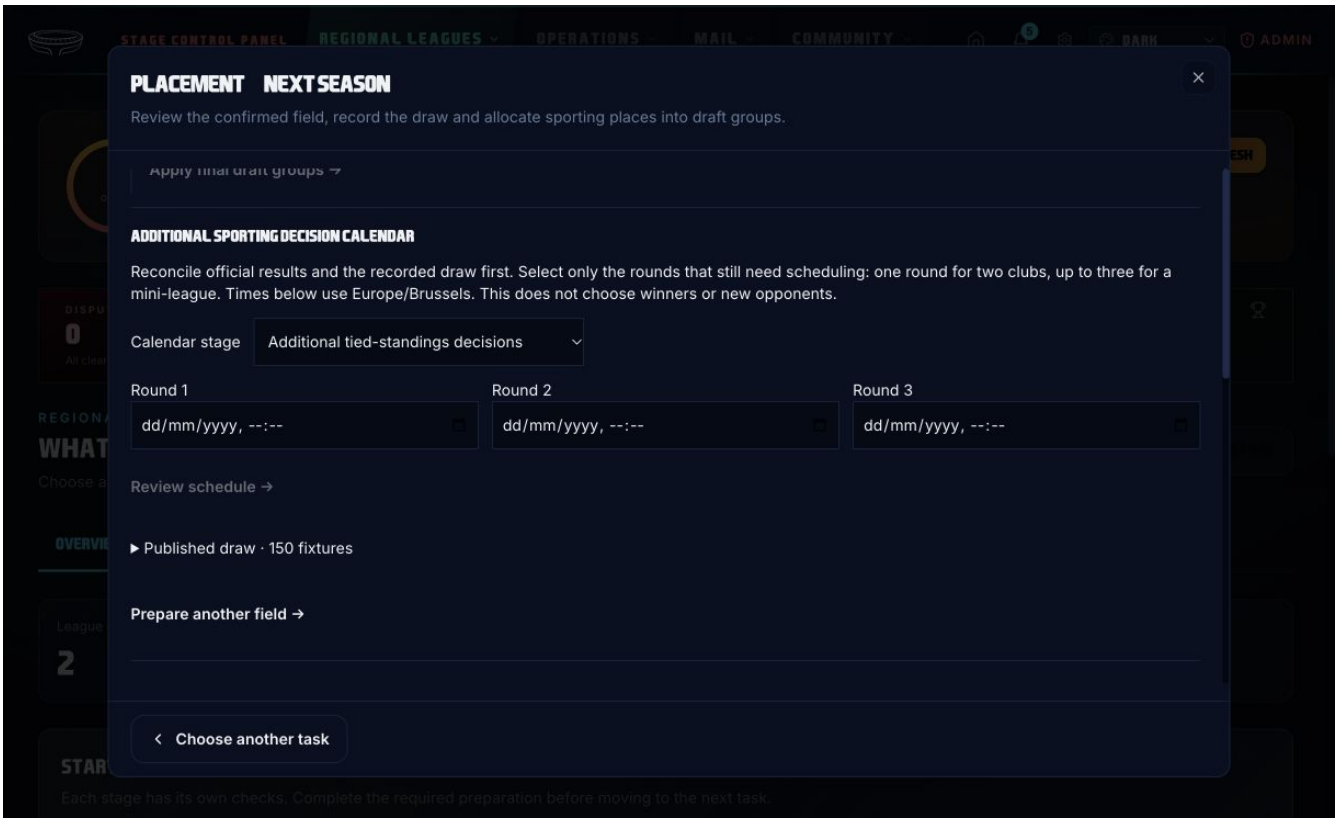

09 · 18-placement-calendar · LOCAL TRAINING

10 / STAGE

Allocate D1A, D2A and D2B from results

Wait for final results and any decision matches. Review and confirm the saved allocation. This placement produces three groups of twenty. D2A and D2B share the permanent D2 identity and trophy. Results were simulated through the application's real result workflow; no EA games were played and no standings were directly populated.

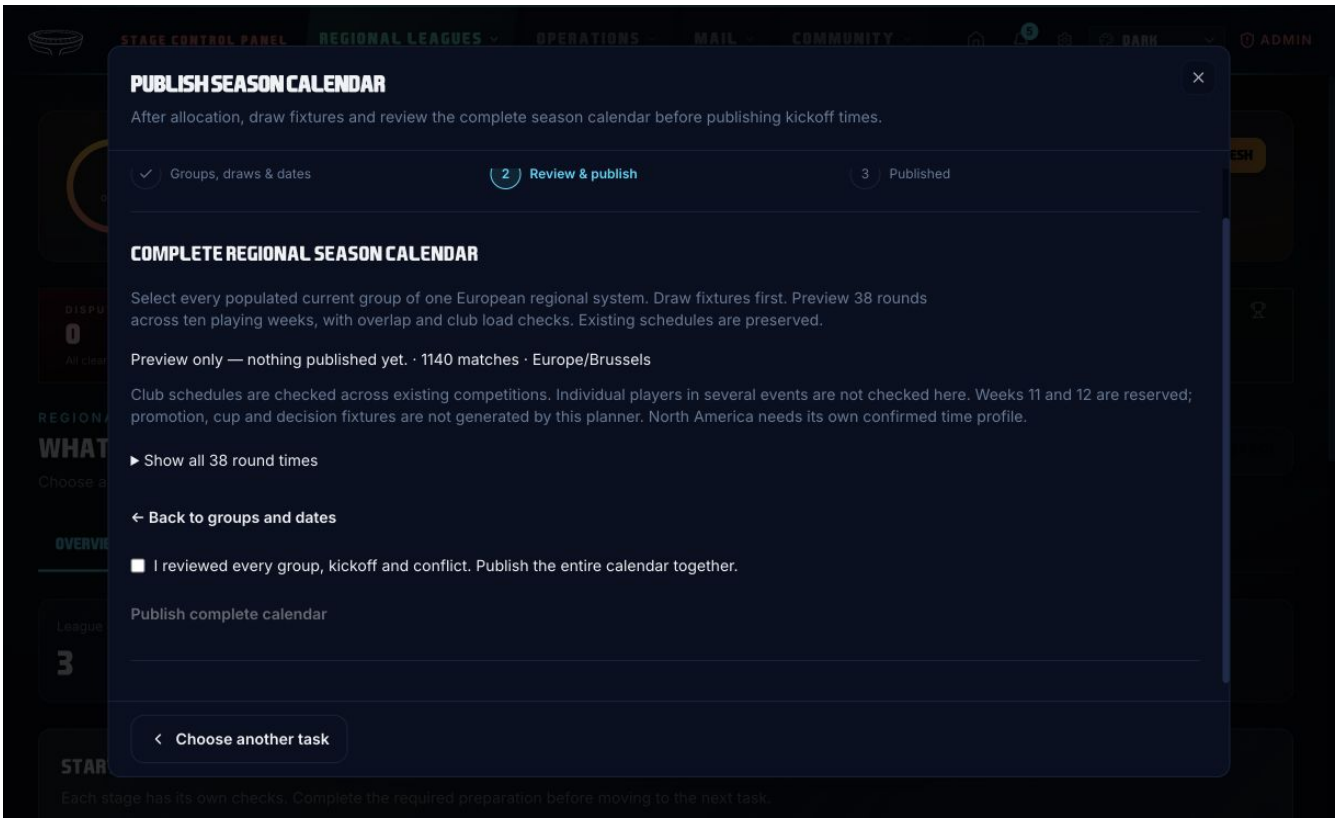

10 · 20-allocation-three-groups · LOCAL TRAINING

11 / STAGE

Drawing fixtures does not publish kickoff times

Open Prepare this season calendar from the stored allocation. Enter Reason, confirm the draw and use Draw this group’s fixtures for D1A, D2A and D2B. Each group receives 380 home-and-away fixtures. Choose the first playing Monday and Preview season calendar. The preview must cover all three groups: 1,140 matches. Review the 38 round times and any blockers before publishing.

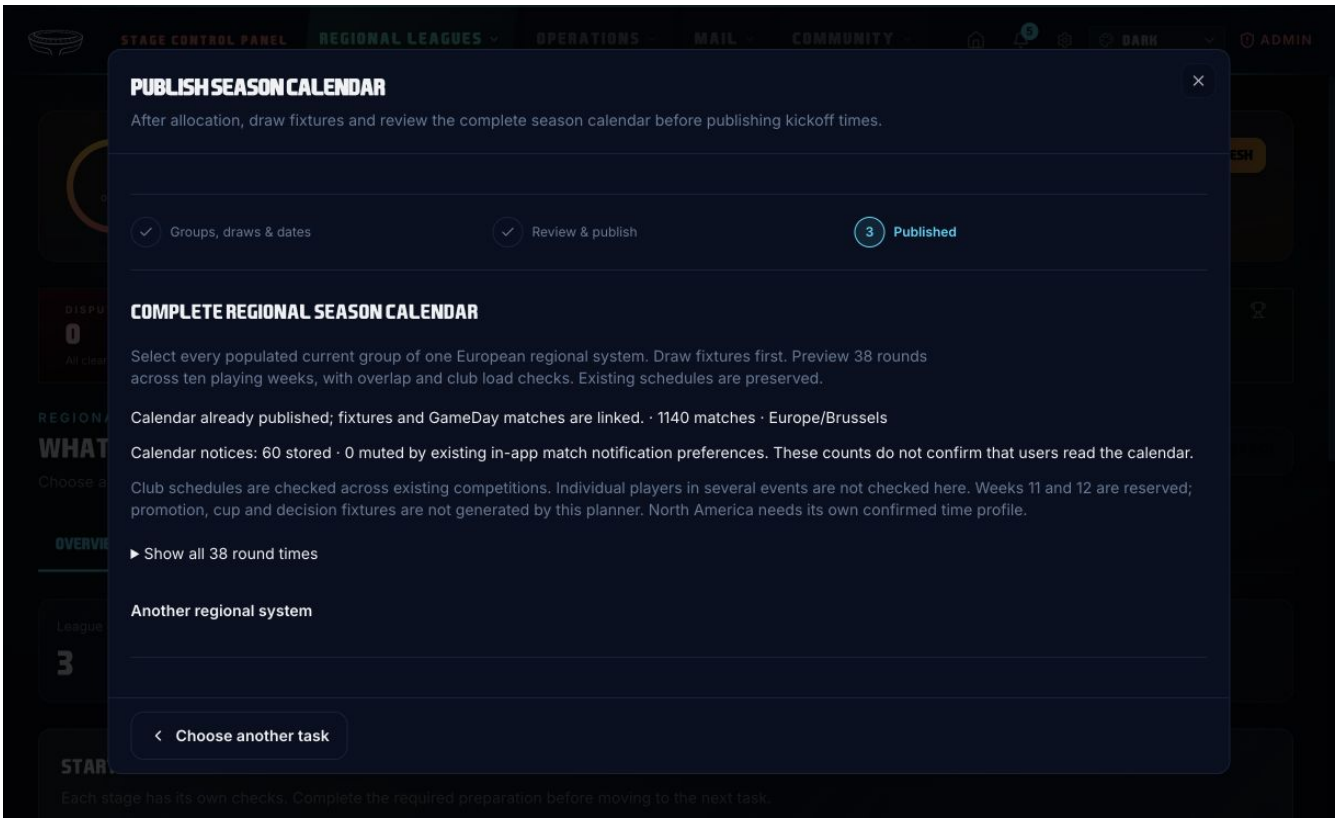

11 · 22-calendar-preview · LOCAL TRAINING

12 / STAGE

Publish the complete league calendar

Tick confirmation and choose Publish complete calendar. Verify that fixtures and GameDay matches are linked. Europe uses Tuesday/Thursday at 20:00 and 20:40 Europe/Brussels, in forty-minute blocks, with 38 rounds over ten playing weeks. Week 11 is for promotion; week 12 includes the Cup final. Stored notification counts do not prove that players read them.

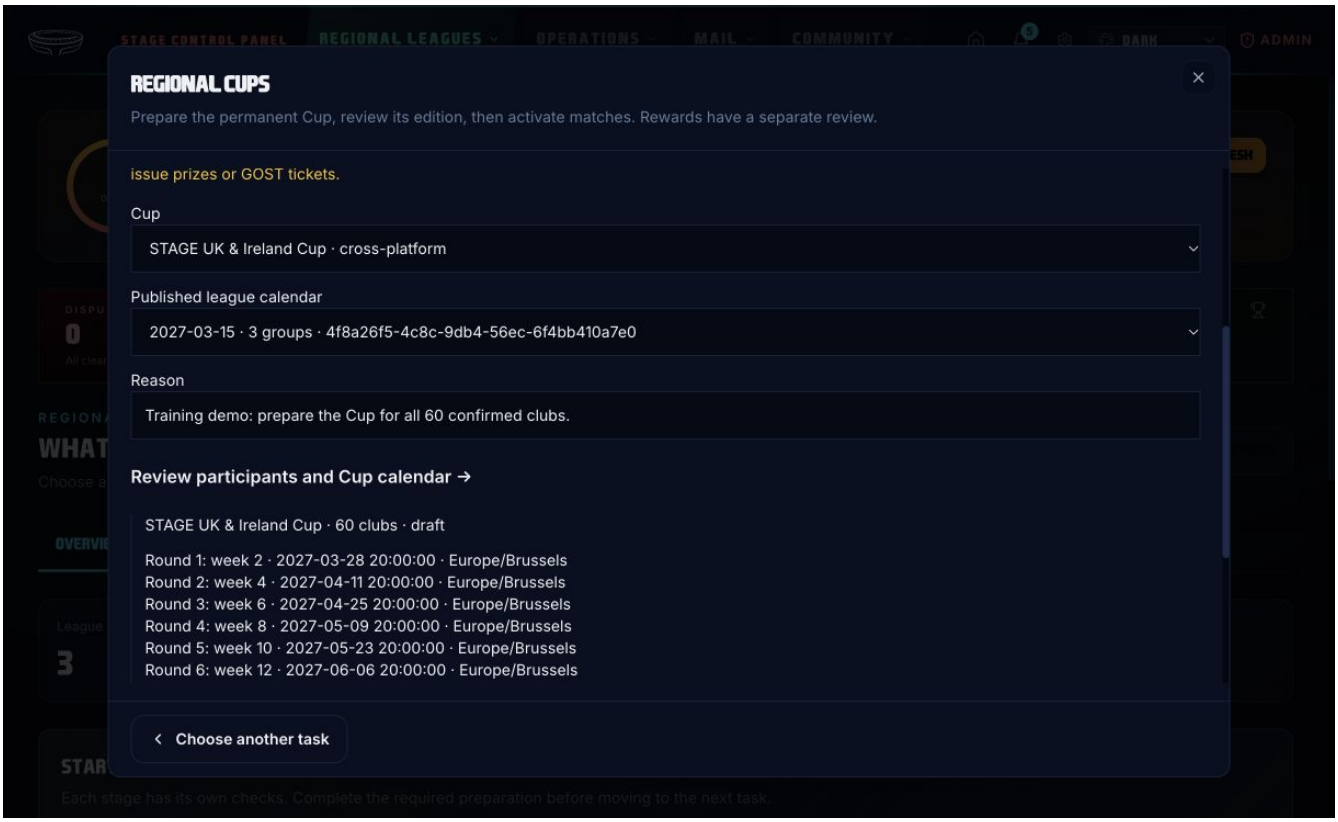

12 · 23-calendar-published · LOCAL TRAINING

13 / STAGE

One Cup for all regional groups

Choose Regional Cups, the permanent Cup and the published league calendar. Its trophy uses the same catalogue flow as leagues and GOST. Review participants and Cup calendar collects all 60 confirmed clubs that accepted Cup entry. The six rounds fall on Sundays in weeks 2/4/6/8/10/12. Save draft and record the first draw stores four byes and 28 first-round matches, without starting the Cup yet.

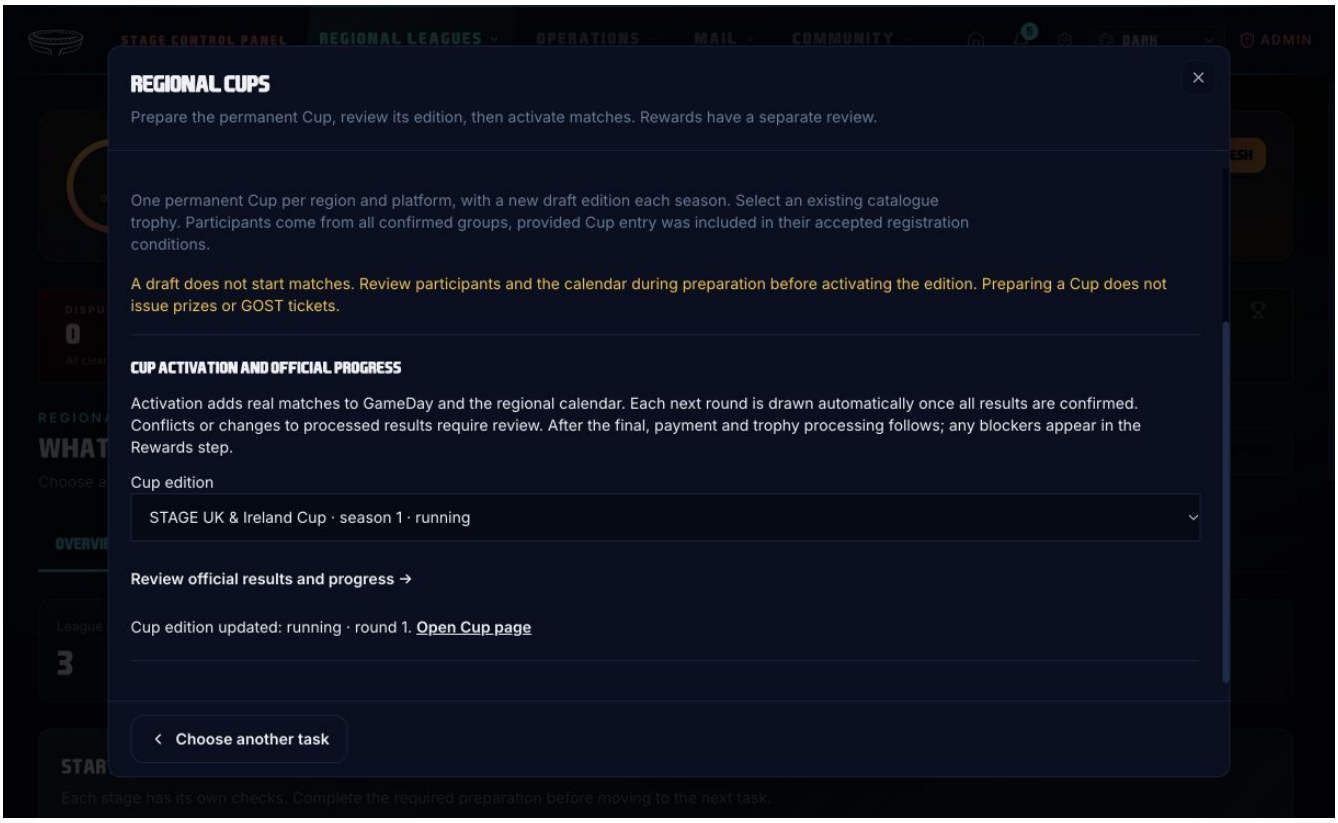

13 · 24-cup-calendar · LOCAL TRAINING

14 / STAGE

Activate and follow the Cup

Open Manage existing edition or Next: review activation. Select the draft, choose Review activation, inspect it and enter a reason. After confirmation, Activate Cup adds the first round to GameDay. The next open draw follows automatically when the previous round is final. A complete 60-club Cup has 59 played matches. It provides no automatic GOST ticket.

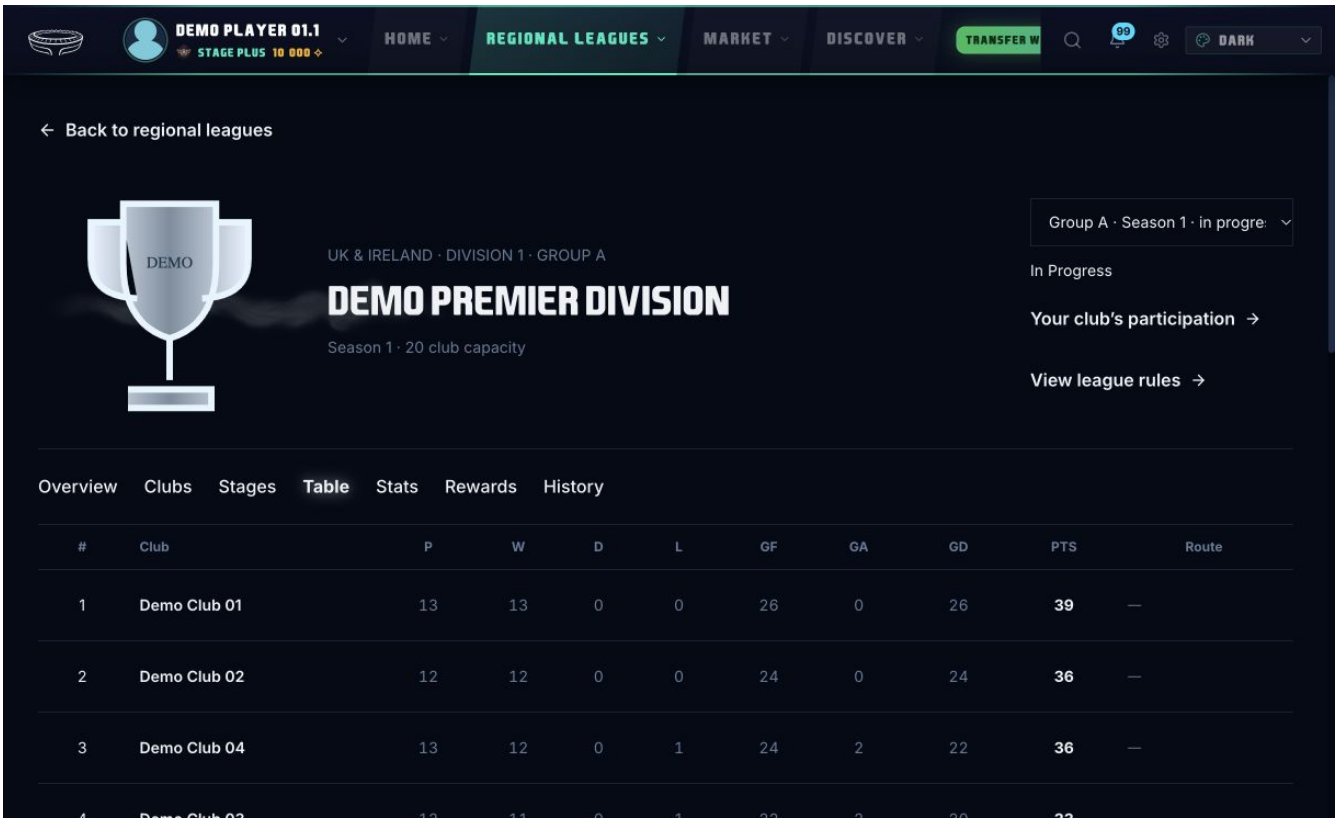

14 · 27-cup-running · LOCAL TRAINING

15 / STAGE

What clubs see on the website

Compete → Regional Leagues shows regions, trophies and individual groups. Explore league opens Overview, Clubs, Stages, Table, Stats, Rewards and History. Table shows points, games played and sporting routes. In this 60-club structure, the bottom four D1 clubs are relegated; each D2 group promotes its champion and one play-off winner. D2 does not relegate into a nonexistent D3.

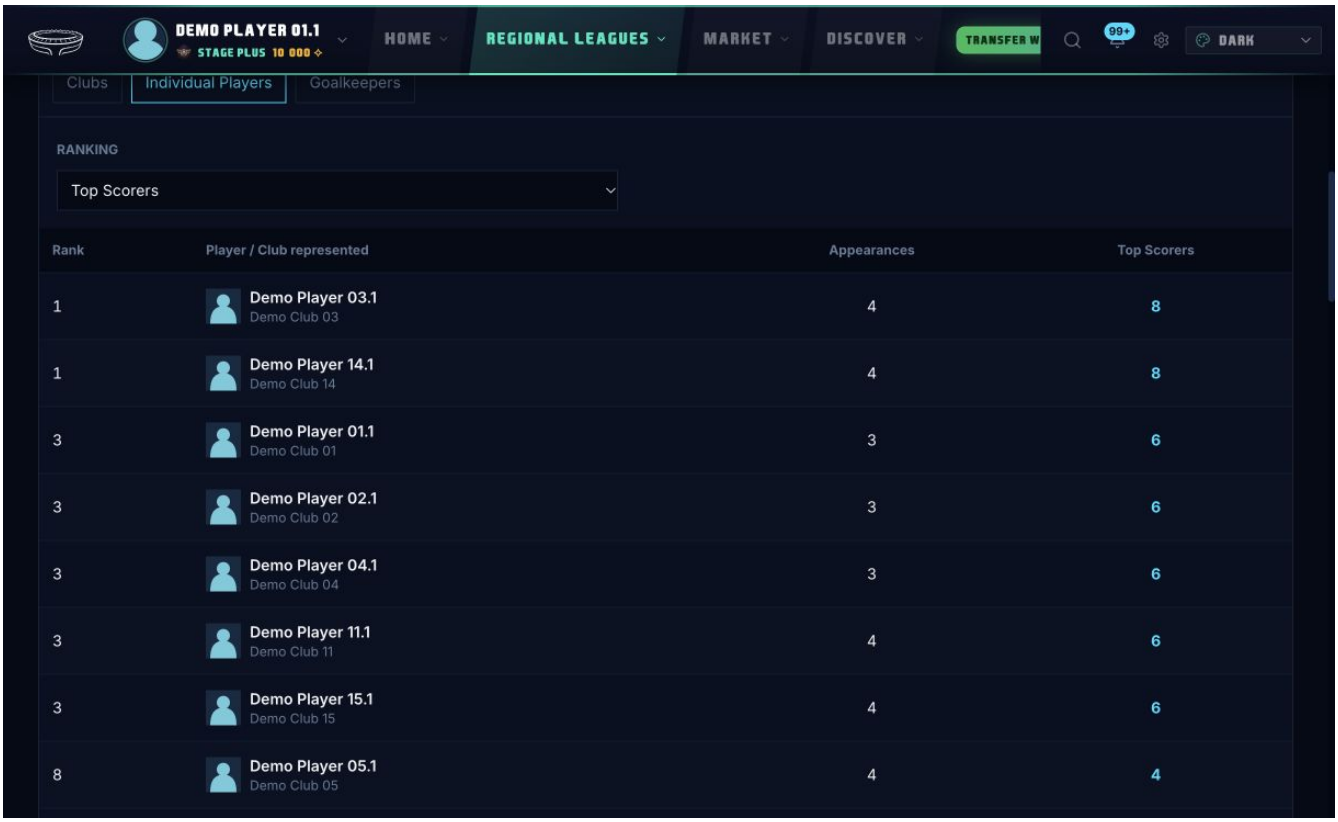

15 · 30-league-table · LOCAL TRAINING

16 / STAGE

Statistics come from the match report

Stats → Clubs shows club totals. Individual Players shows goals, assists, ratings and appearances; choose a leaderboard under Ranking. A score alone is insufficient: the report must identify actual participants and their club, goals and assists. The demonstration declares three players per club with synthetic goals. These are STAGE declarations, not automatic EA verification.

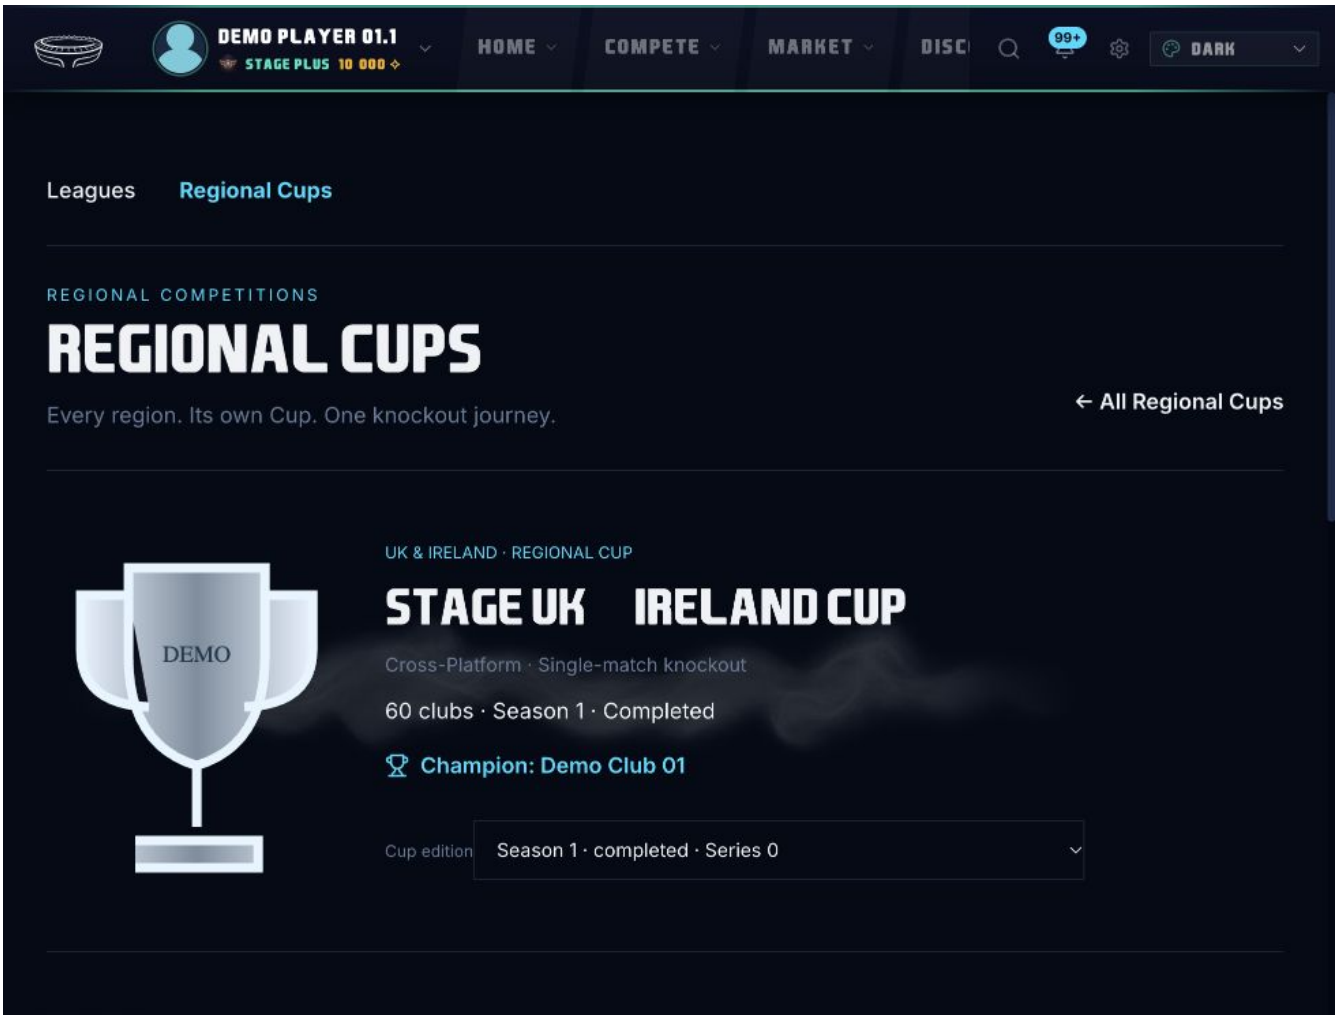

16 · 32-player-statistics · LOCAL TRAINING

17 / STAGE

Verify the complete Cup

After the final, the public Cup page shows Completed and its champion. All six demonstration rounds finished: 28 + 16 + 8 + 4 + 2 + 1 = 59 matches. The four byes are neither played games nor player appearances. Use Stages & results for rounds and History for other editions.

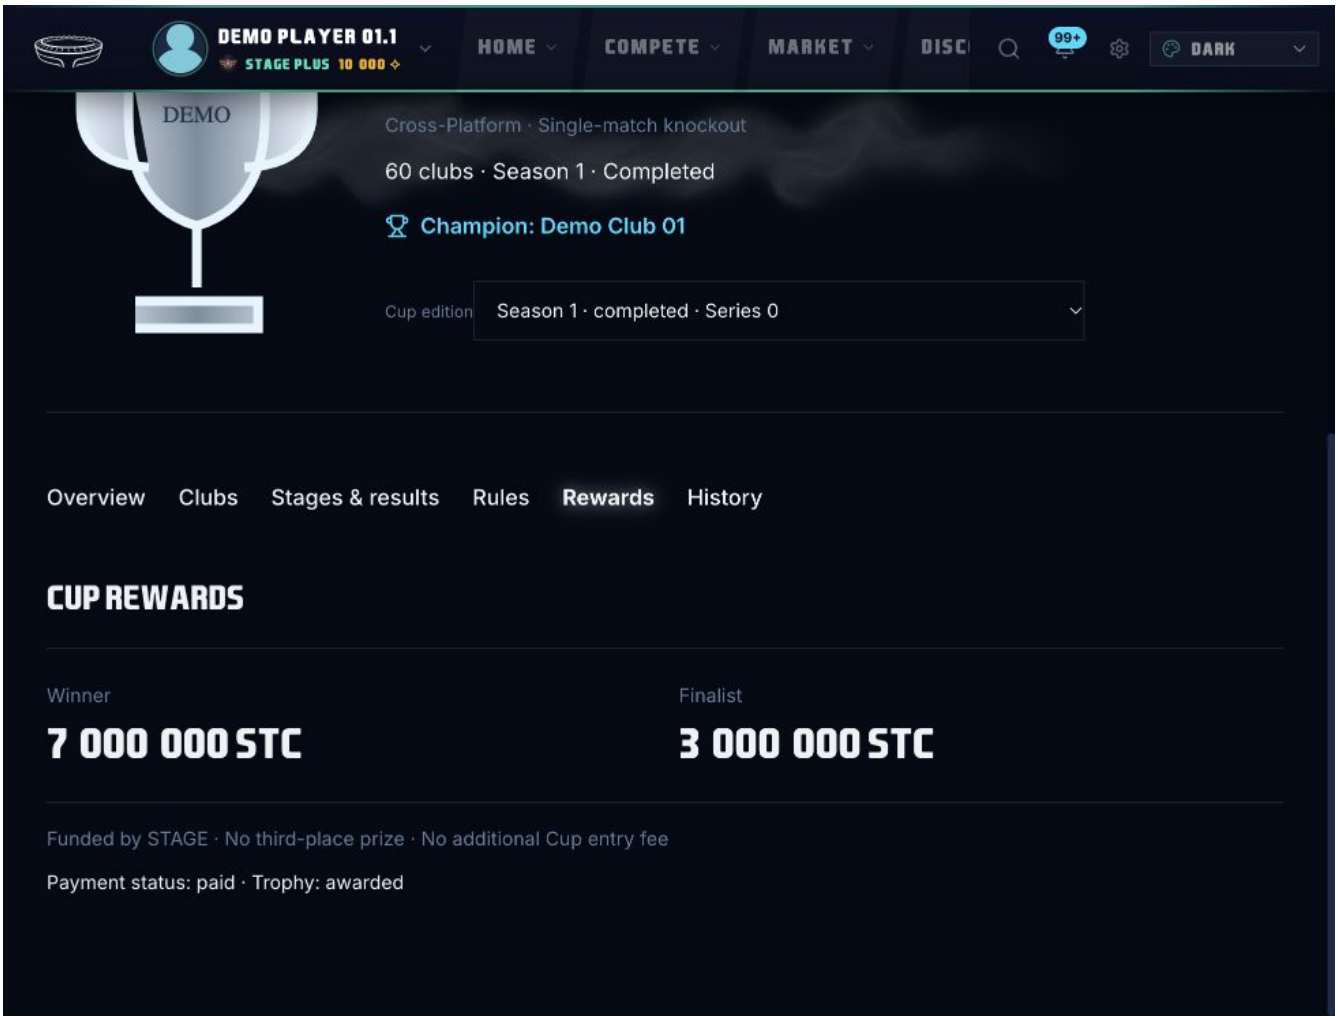

17 · 35-cup-completed · LOCAL TRAINING

18 / STAGE

Verify rewards and the trophy

Rewards shows 7,000,000 STC for the winner and 3,000,000 STC for the finalist, funded by STAGE. No third-place prize or additional Cup entry fee. The demonstration shows Payment status: paid and Trophy: awarded. In Admin, use Regional Cups → Review rewards. These are local test STC ledger entries, not real payments. Reopening a page is not a reason to issue rewards again.

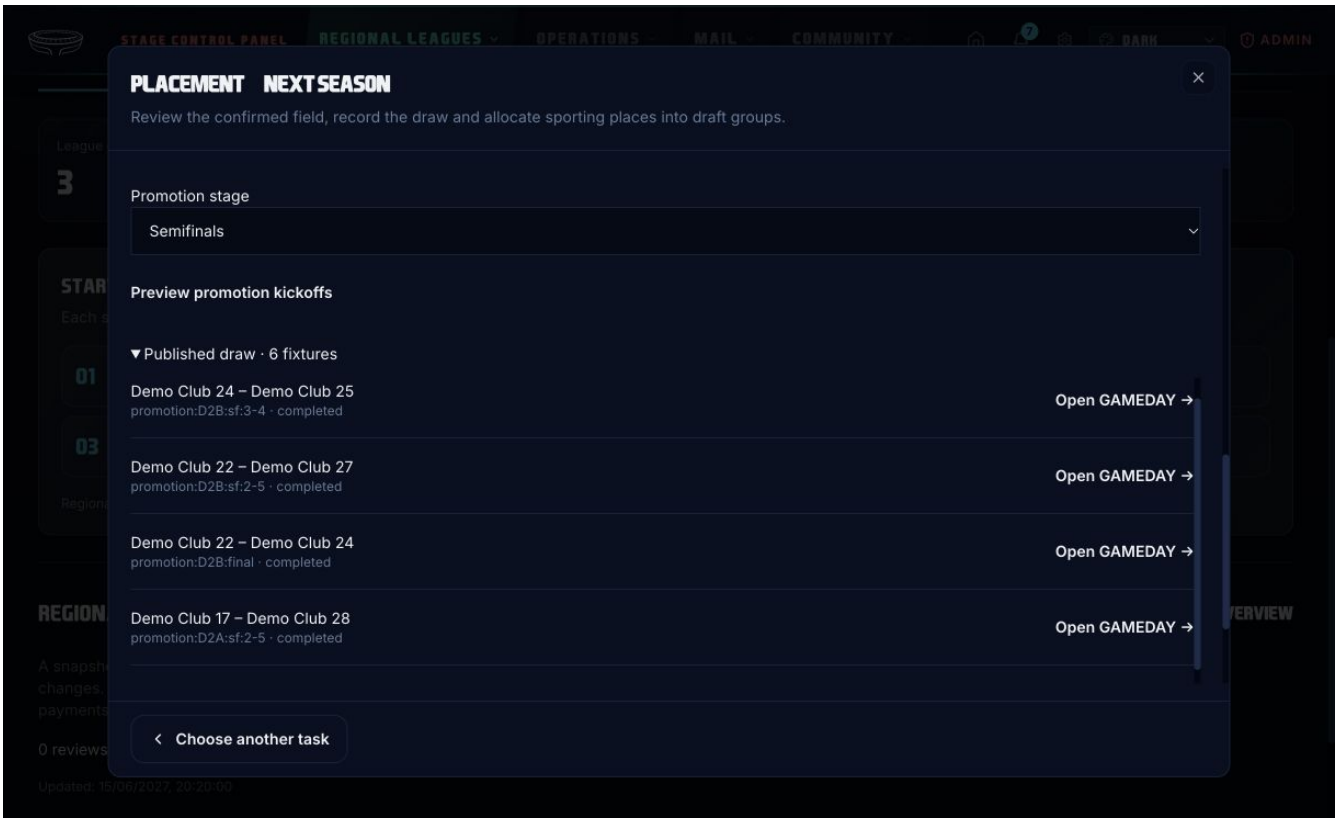

18 · 36-cup-rewards · LOCAL TRAINING

19 / STAGE

Follow promotion and relegation

The same 60 clubs renewed and confirmed for season 2. Final league standings produce four promotion semifinals and two finals. In each D2 group: 2 plays 5 and 3 plays 4; the final winner joins the champion in promotion. Demo Club 12, 16, 17 and 22 were promoted; Demo Club 20, 23, 34 and 37 were relegated. The stored transition cycle preserves sporting allocation; existing clubs do not repeat initial placement.

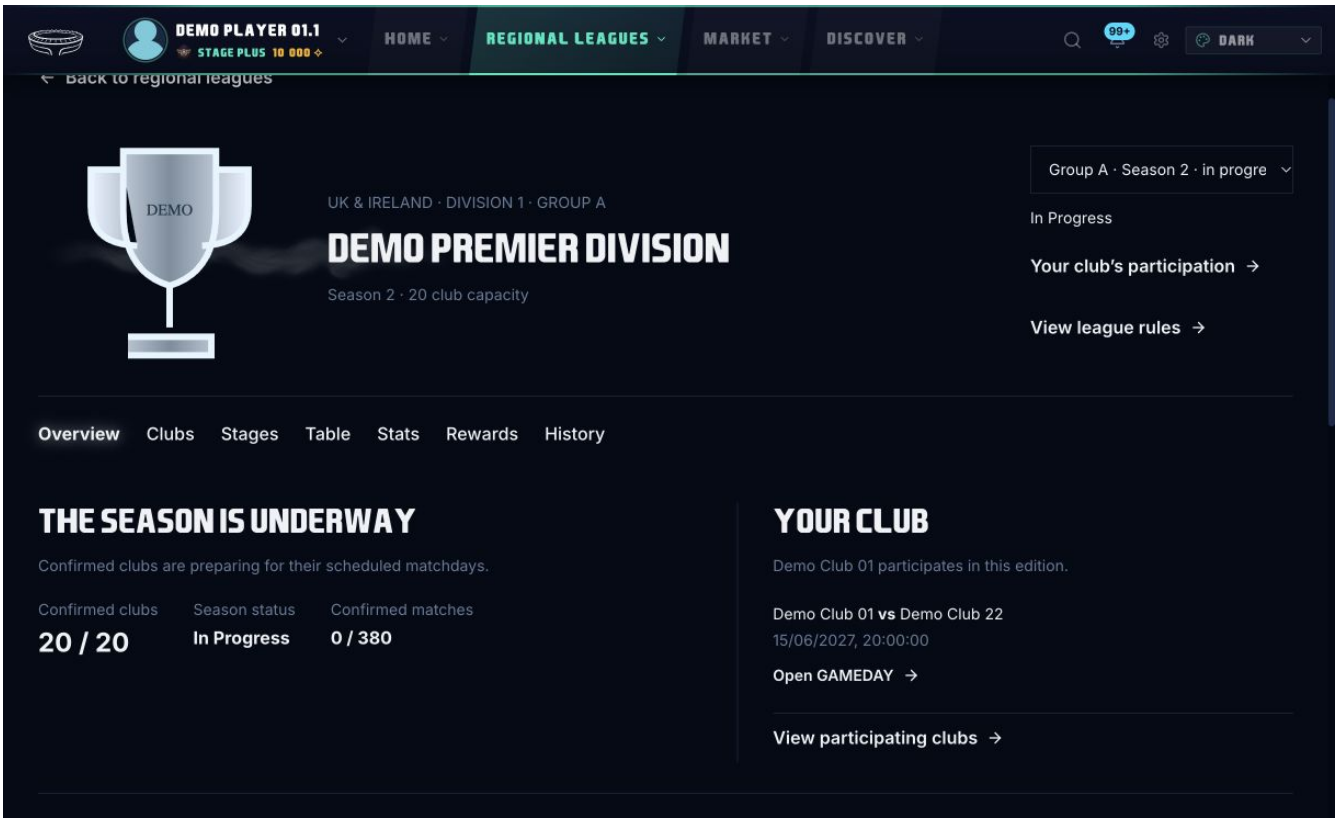

19 · 39-promotion-allocation · LOCAL TRAINING

20 / STAGE

A new season in the same permanent league

Automatic rollover filled D1A, D2A and D2B with 20 clubs each for season 2, published the next league calendar and prepared and activated the next Cup. The demonstration also confirmed the first season-2 match. Permanent D1/D2 identities and their trophies stayed the same. The selector exposes seasons 1 and 2 as separate editions, not duplicate independent leagues.

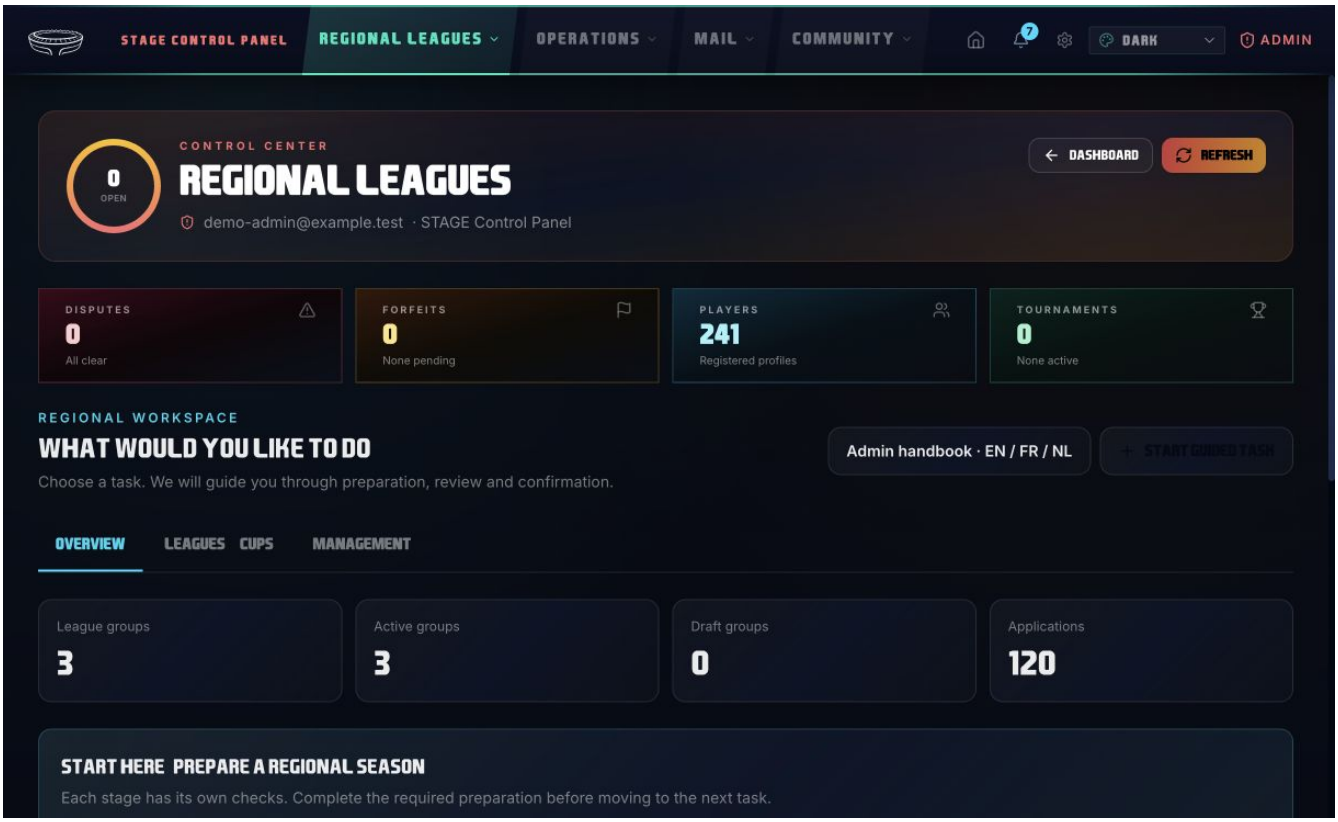

20 · 38-season-selector · LOCAL TRAINING

21 / STAGE

Where to find everything

Admin → Regional Leagues → Admin handbook · EN / FR / NL opens these guides. Start guided task opens the wizards. Leagues & Cups → Manage league contains Setup & actions, Fixtures & results and Standings. Regional Cups contains preparation, activation and Review rewards. Exceptions belong in Official decisions; reset and deletion are not normal season steps. All three guides share the same steps and screenshots. Default application text remains English.

21 · 40-admin-handbook · LOCAL TRAINING

Field dictionary

UI label	Example	Meaning
Name	Demo Premier Division	Display name of the permanent league.
Regional system slug	uk-ireland	Regional key. Use the same key for D1, D2 and the Cup.
Platform	cross-platform	Platform scope; keep it consistent within the system.
Division	1 / 2	The tier, not the group count. D2B is still Division 2.
Capacity	20	Clubs per group, not total regional capacity.
Linked division slug	uk-ireland-div-1	Use the existing linked division key when needed; do not invent another region.
Default trophy	Demo D1 Trophy	Existing Trophies item. Assignment displays the trophy; it does not award it.
Rules (JSON) / Reward defaults (JSON)	{}	Advanced and optional. Leave unchanged unless using a supported configuration; normal participation terms belong in registration.
Reason / Administrative reason	Training: first regional season	Required audit explanation, not a general rule promised to players.
Regional system	uk-ireland · cross-platform	Entry point for all divisions and groups in this regional/platform system.
Target season	1	Edition number. Do not create another permanent league to change seasons.
Reset series	0	Reset-series identity, not a normal season control. Leave unchanged for ordinary rollover.
Registration opens (your local time)	18 Jan 2027, 01:00 Brussels	Start of four registration weeks. Preview calculates the shared confirmation deadlines.
First league playing Monday (optional)	2027-03-15	First league week after reserves and any required placement. Without it, automatic publication can wait for Admin.
Include Regional Cup entry	checked	Includes automatic Cup entry in the conditions clubs accept beforehand.
Published edition rules	Schedule + minimum players + format	Edition terms; also read the server-appended policies in the preview.

UI label	Example	Meaning
Saved cycle	region / series / season	Resumes the stored draw and allocation. Reopening does not require another cycle.
Confirmed field / Target count	60	The confirmed field, not a forecast of future registrations.
Source groups	D1A, D2A, D2B	For a subsequent edition: all current source groups with final results.
Round date / time	20:00 Europe/Brussels	Actual kickoff for that placement or decision round. Verify the timezone.
Monday of the first playing week (Europe/Brussels)	2027-03-15	Calendar anchor for all selected league groups together.
Published league calendar	2027-03-15 · 3 groups	Source of Cup participants and playing weeks; do not choose an unrelated edition.
Cup edition	Season 1 · draft	The seasonal edition being prepared, activated or reviewed for rewards.
Expected revision / preview	automatic	Technical preview version. Refresh the preview after changes; do not bypass a blocker.

Who does what?

Admin chooses the region, permanent leagues, trophies, date and edition conditions. Clubs apply, confirm players, play and provide evidence. The server stores draws, processes confirmed results, calculates standings and prepares supported next steps. Disputes, withdrawals, sanctions and financial exceptions remain explicit Admin decisions. This demonstration opens neither GOST nor D3.

The next edition

Renewal opens in playing week 5 and runs through week 8. Week 9 is confirmation; the shared reserve period lasts at most 48 hours. Promotion play-offs are in week 11: Tuesday semifinals and Thursday finals, 20:00 Europe/Brussels. The next league starts after week 12 and one transition week. Never use Fresh-start reset for normal season rollover. Permanent league identity and its default trophy stay; historical editions remain available separately.

Evidence and limits

This handbook uses actual screenshots from local training with synthetic clubs, accelerated time and simulated scores. Admin setup was performed on the website. Bulk registration and match processing explicitly used a test helper and existing protected application actions. No real emails were sent, no EA integration was demonstrated and nothing was deployed to production. A training run does not prove every exception or production scale. The first simulated batch omitted club metadata in player statistics. The helper was corrected; individual competition screenshots cover only the subsequent correctly linked reports. Full-season individual statistics are therefore not signed off as a complete acceptance pass.
